

PORTABLE SCANNERS & PRINTERS

PORTABLE SCANNER

If you need to scan on the go, consider something like the Fujitsu ScanSnap S1300i or ScanSnap iX100. These are full-fledged scanners, yet small enough to be portable. The iX100 is even battery-powered for truly remote scanning.

Alternately, if you have a modern smartphone, you are already carrying an excellent camera, and hence scanner, in your pocket or purse. Look at document scanning apps. Our recommendation is SwiftScan (<https://swiftscan.app/en/index.html>). It works on iOS (<https://apps.apple.com/app/apple-store/id834854351>) and Android (<https://play.google.com/store/apps/details?id=net.doo.snap>). It does multipage documents, optical character recognition, and document storage and sharing through all major cloud storage vendors. There's a free version to try. \$35/yr unlocks all the features.

PORTABLE PRINTERS

You will not be surprised to know that you also have portable printer options. For example:

HEWLETT PACKARD OFFICEJET 100 MOBILE PRINTER - \$160 - 6.9 x 13.7 x 3.3 inches and weighs 5.1 pounds.

CANON PIXMA IP100 - \$160 for battery - 12.7"(W) x 2.4"(H) x 7.2"(D), 4.4 lbs.

EPSON WORKFORCE WF-100 WIRELESS MOBILE PRINTER - \$200 - 5.1 x 15.1 x 10.2 inches, 4.6 lbs.
